

**Amendments to the Specification**

Please amend the specification as follows:

Replace paragraph [0003] with the following paragraph:

[0003] A particular embodiment of the invention is described below in more detail, by way of example only, and with reference to the accompanying drawings in which:

Fig. 1 is a schematic section of a fluid working machine

Fig. 2 is a schematic illustration of the interconnection of elements of the fluid working machine illustrated in Fig. 1

Add the following paragraph after paragraph [0008] of the application:

[0009] Referring to Fig. 2, the system includes a plurality of working chambers designated 4w, 4x, 4y, 4z, each of which is configured substantially similar to the working chamber described above and illustrated in Fig. 1. Each of the working chambers 4w, 4x, 4y, 4z is connected with the commutator valve 2 via fluid lines. A plurality of valves designated 1a, 1b, 1c, 1d are disposed in the fluid lines between the working chambers 4w, 4x, 4y, 4z and the commutator valve 2. Each valve is operatively connected with the electronic controller 6 so that the controller is operable to control each valve as described above.
